ABSTRACT

In October 1985, Broome Community College (BCC) conducted its eleventh annual graduate survey. The survey was administered in-person during graduation rehearsal, and also mailed to those who did not attend rehearsal. Study findings, based on a 93% response rate, included the following: (1) 1183 students graduated from BCC as members of the class of 1985; (2) 91% of the responding graduates found employment (50%) or transferred to four-year colleges or technical schools (41%); (3) only 6% were unemployed, the lowest percentage in 11 years; (4) the average annual salary of the working graduates was $14,239, with a range between $6,968 and $24,000; (5) among the employed graduates, 85% went to work in Broome County or the Southern Tier; (6) the top employers of BCC graduates were large industries in New York State, retail stores in Broome County, and small businesses in Broome County; (7) 61% of the respondents indicated that their current job was directly related to their academic curricula; and (8) among the graduates who transferred, 65% enrolled in the State University of New York system. Data tables showing survey responses by program and the survey instrument are appended. (Author/EJV)

INTRODUCTION

Ninety-one percent of the class of 1985 at Broome Community College found employment or transferred for further education, according to the eleventh annual survey conducted by the College Placement Office.

- 50 percent were employed leaving an unemployment rate of 6 percent - the lowest since the survey was inaugurated.
- 41 percent transferred to four year colleges or technical schools.
- For those employed, 85 percent went to work in Broome County or the Southern Tier.
- For those transferring, 65 percent enrolled in schools in the State University of New York system.

These statistics and others are outlined on the pages that follow. All statistics in this report are based on a 93 percent response to the survey and reflect the graduate status as of October 22, 1985.

The survey instrument can be found on the last page. The method of data collection proceeded as follows:

1. Administered at graduation rehearsal.
2. Mailed to those not attending rehearsal with a June 19th return requested.
3. Phone calls made during June and July to those who didn't respond.
4. Second mailing sent on July 15th to those who indicated they were working a part-time temporary position, unemployed or unsure of transfer plans. In addition, second mailing went to those who reported no information, with an early August return requested.
5. Second phone calls made to those with no information or incomplete information.
6. Data obtained from the above steps was sent to Department Chairpersons asking for information they could add with an October 3 return requested.

"NA" refers to information which is "not available" due to insufficient response or a non-existent program. "Unavailable for employment" includes those who travel, marry and decide not to work, or otherwise prefer not to seek employment at this time.

There were 1183 degrees awarded, the highest in Broome Community College history. The actual number of graduates was 1175 as eight graduates received two degrees. All statistics are based on 1183 - the actual number of degrees awarded.

Salary information is based on entry-level salaries in full-time positions directly or indirectly related to area of study. Second or third shift differentials are not included. Additionally, all percentage figures were rounded to the nearest whole number which accounts for total figures between 99 and 101.

Recognition is given to Mary O'Brien and Joan Finney for their persistent efforts to obtain data: to Ida Kenyon for typing the entire survey: and to Larry Truillo for assisting with the hand calculation of all data.

Anne Scott
Director of Placement
December 1985
